<b>10.20</b>	<b>Best Practices Adopted, If Any</b>	<p><b>1. ERP:</b> Coll Poll is the ERP software used in the institute as a web and mobile based digital learning and analytics platform designed to address the rising complexity, competition developed and digital compliance of higher education institutions. Collpoll is used in the institute for lesson planning, scheduling, mapping with CO-PO, online Quiz, online assignments and attendance monitoring and test conduction. It is used for following purposes: -</p> <ul style="list-style-type: none"> <li>• Master Data Management</li> <li>• Admission Automation</li> <li>• Outcome based Education</li> <li>• Curriculum &amp; Timetable Management</li> <li>• Learning Management System</li> </ul>

- AI-proctored Examination Management
- Placement Management
- Campus Workflow Digitization
- Fee Management (Cashless Campus)
- Infrastructure Management
- HR Management

This is the ICT based practice executed during pandemic situations. The main advantage of this platform is that students can learn at own pace and instructions are available 24\*7 anytime anywhere learning. Immediate assessment is available for evaluation to identify advanced learners and support weak learners.

**2. Alumni Expert sessions** Alumni expert talk sessions were conducted in various programs to cater the upcoming need of industry in advanced technologies like Data science, Machine learning, Artificial Intelligence, Cloud Platform, Block chain technology etc. The sessions were made to reach out to the students and faculty. 40 alumni from across the globe delivered sessions on this platform to provide opportunity for students to enrich their knowledge in the various areas. Distinguished alumni such as Mr. Omkar kulkarni, SDE- Database, Washington, Mr. Vinit Shah, General Manager, Surelines, Mr. Pravin chaudhary, Director, Virtuoso Project and Engineers, Mr. Ajinkya Borude, Director Greenomind Innovation etc. from various parts of the globe contributed for delivering state of art knowledge in respective domains. There are diverse deliberations on various topics like Data Warehouse and business intelligence, Software testing with automation and trending tools, upcoming drone, Performance Evaluation of Classification Models Using Confusion Matrix, career opportunities in various sectors were conducted. Thus, these sessions help the students for better placement with a workaholic environment.

**Institutional Distinctiveness OBE : CO-PO/PSO Mapping & Attainment for Employability** Due to industry revolutions, faster technological developments in software and allied artificial intelligence integrations, pandemic like covid-19, placement scenarios and entrepreneurship/business opportunities are changing rapidly. To achieve this, we are making CO as a knowledge and CO-PO as application of knowledge. We examine whether CO-PO is possible through curriculum or curriculum gaps. Further, we are

identifying outcome opportunities for each PO and specific to each program. To align alumni profiles through PSO, the strategy is implemented with the formation of a question bank to develop students for technical recruitment. By doing CO-PSO we are aligning students' profiles with alumni profiles. For attainment of CO-PO and CO-PSO, we are doing statistical analysis and calculating discrimination index. The blooms taxonomy level for Program outcomes are identified from PO statements and mapped with technical questions in CO-PO. If the discrimination index is more than 40%, observations are made and further action plan is created else CO-PO mapping is revisited for modification. This will be implemented through an action plan for next year's CO-PO and CO-PSO questions. As in all, micro level analysis is performed by each and every faculty for each and every student to prepare them technically for placement, higher education and to create students technical expertise as per alumni profiles.
